Experience

Fozo *Founding Engineer*

Dec 2025 – Present

- Built the **entire mobile application** for a **surplus food delivery platform** from scratch using **React Native, Expo, NextJS, and Node.js** — covering everything from architecture decisions to production deployment.
- Maintain and develop the admin dashboard and backend services using Next.js, **handling both customer-facing and internal tooling end to end**.
- Architected the system for scalability from day one, **supporting up to 1,000 concurrent users with low-latency performance** across the application.
- Set up and **manage the full AWS infrastructure** including deployment pipelines, monitoring via newrelic and mixpanel, and production operations — **keeping the system reliable without a dedicated DevOps team**.
- Built and own the CI/CD automation pipeline, **enabling seamless automated deployments and end-to-end testing across environments**.
- Drove UI/UX decisions with a **user-first approach**, contributing to higher engagement and retention rates as the product grew.

Projects

Exness — CFD Trading Platform

Github / Live Link

- Built a web platform to view **real-time crypto prices** from Binance, **place buy/sell orders**, and analyse market trends with **interactive candlestick charts**.
- Build an **Mobile Version** of exness using **React-Native / Expo** and Publish it using **EAS**.
- Deploy the entire project using **AWS and Terraform** and add **monitoring to analyse user interactivity**. and **maintain load balance and ASG** for auto scalability.
- **Tech Stack:** Turborepo, Expo, Redis, Pub-Sub, TimescaleDB, Websocket, PostgreSQL.

Unlovable — AI-Powered RAG and Code-Generation Platform

Github / Live Link

- Built an **application builder**, where anyone can able to **generate an web or mobile application** using a prompt and creativity.
- Built a **second variants** of architecture using **Kubernetes, Docker, and Nginx** to manage scalable **AI workloads from scratch**.
- **Tech Stack:** Turborepo, Expo, E2B sandbox, Redis, Websocket, PostgreSQL, langchain, langgraph, RAG.

Education

K.R. Mangalam University *Gurgaon, Haryana*

May 2025

Bachelor of Computer Applications (BCA) — Artificial Intelligence / Data Science
CGPA: 7.5/10

Skills

Languages: JavaScript, TypeScript, Python, SQL

Frontend: React, Next.js, Turborepo, React Native, Expo.

Backend: Node.js, Express.js, FastAPI, Websocket, webhooks, GraphQL.

Databases: PostgreSQL, MySQL, Redis, timescaleDB.

Cloud - DevOps: AWS, Docker, Kubernetes, Nginx, CI/CD, Linux.

AI/LLMs: LangChain, LangGraph, RAG Systems, AI Agents, Vector Databases

Architecture: System Design, Scalability, Performance Optimization, Microservices and DevOps.
