Experience

Testsigma *Software Engineer* Bangalore, India Jul 2025 – Present

- Improved Arcus, Testsigma's core product, by **significantly reducing latency and enhancing application performance**.
- **Built AI systems and agents from scratch**; optimized them for **cost, latency, and accuracy** using Go, Python, Java, and AI harnesses.
- Developed a workflow that **doubled execution speed** while adding **multiple layers of security review**.
- Contribute across **backend, frontend, and infrastructure** to improve the product and test automation workflows.

Fozo *Founding Engineer* Dec 2024 – Jun 2025

- **Built the mobile application from scratch** for a surplus-food delivery platform using React Native, Expo, Next.js, and Node.js.
- Developed customer-facing features, admin tools, and backend services for the platform.
- Architected the system to support **up to 1,000 concurrent users** with low-latency performance.
- Managed **AWS infrastructure, CI/CD, monitoring, and production operations**, supporting reliable deployments without a dedicated DevOps team.

Projects

Exness – CFD Trading Platform GitHub / Live Link

- Built a trading platform with **real-time Binance crypto prices**, buy/sell orders, and **interactive candlestick charts**.
- Developed a **mobile version** using React Native and Expo, and published it with EAS.
- Deployed with **AWS and Terraform**, adding monitoring and autoscaling. **Stack:** Turborepo, Redis, Pub/Sub, TimescaleDB, WebSockets, PostgreSQL.

Unlovable – AI-Powered RAG and Code-Generation Platform GitHub / Live Link

- Built an **application builder** that generates web and mobile applications from natural-language prompts.
- Developed a scalable architecture for **AI workloads from scratch** using Kubernetes, Docker, and Nginx.
- **Stack:** Turborepo, Expo, E2B sandbox, Redis, WebSockets, PostgreSQL, LangChain, LangGraph, RAG.

Education

K.R. Mangalam University *Gurgaon, Haryana* May 2025
Bachelor of Computer Applications (BCA) – Artificial Intelligence / Data Science
CGPA: 7.5/10

Skills

Languages: JavaScript, TypeScript, Python, Go, Java, SQL

Frontend: React, Next.js, React Native, Expo, Turborepo

Backend: Node.js, Express.js, FastAPI, WebSockets, Webhooks, GraphQL

Databases: PostgreSQL, MySQL, Redis, TimescaleDB

Cloud – DevOps: AWS, Docker, Kubernetes, Nginx, Terraform, CI/CD, Linux

AI/LLMs: LangChain, LangGraph, RAG systems, AI agents, vector databases

Architecture: System design, scalability, performance optimization, microservices, DevOps
